## Small Engine Mechanic - Lead

(Posted 11/28/2018)

### Who are we looking for?

We are looking for the right candidate to perform diagnostic, service and repairs to small to medium duty landscaping, construction and grounds maintenance equipment. He or she must be able to work Monday through Friday from 7:30 am - 4:30 pm.

### What we do?

We are a full-service dealership for Municipalities, Small to Large Business and Homeowners in need for Landscape, Construction and Agricultural Equipment. The best way to summarize it, we are similar to a car dealership, we just work on the fun stuff! We provide Sales, Parts, Service and Rental Support from anything such as a Grass Trimmer to 110 HP Tractors.

### Who are we an authorized dealer for?

We are an authorized dealer for Toro®, Stihl®, Kubota®, Honda Power Equipment, Kawasaki, Kohler®, Briggs & Stratton®, Mahindra, New Holland, Finn, Bandit, Gilly Goat, CAM Superline & many more.

### What will you work on?

You will lead a Small Equipment Shop and provide service support on brands such as Toro®, Stihl®, Kubota®, Honda Engines, Kawasaki, Kohler, Briggs & Stratton. You can say that we work on any make, any model.

### What is a typical day like?

Mechanics' tasks vary in complexity and difficulty. Many jobs, such as maintenance inspections and repairs, involve minor adjustments or the replacement of a single part. Others, including piston calibration and spark plug replacement, may require taking the engine apart completely.

Mechanics use a variety of hand tools, including screwdrivers, wrenches, and pliers, for many common tasks. Some mechanics also may regularly use compression gauges, ammeters, and voltmeters to test engine performance. For more complicated procedures, they commonly use pneumatic power tools or diagnostic equipment.

## What will we look for?

**Customer-service skills.** On occasion, mechanics may discuss equipment problems and repairs with customers. They should be courteous, good listeners, and ready to answer customers' questions. It is important to note; Security Equipment frequently depends on repeat clients for business.

**Detail oriented.** Mechanical and electronic malfunctions often are due to misalignments or other easy-to-miss errors. Mechanics must account for those types of problems when inspecting or repairing engines and components.

**Dexterity.** Many tasks, such as disassembling engine parts, connecting or attaching components, and using hand tools, require a steady hand and good-eye coordination.

**Mechanical skills.** Mechanic must be familiar with engine components and systems and know how they interact with each other. They must frequently disassemble major parts for repairs and be able to reassemble them properly.

**Troubleshooting skills.** Mechanics, especially small equipment, must be able to identify problems in increasingly complicated mechanical and electronic systems using diagnostic equipment. They must be familiar with electronic systems and the appropriate tools needed to fix and maintain them.

## Requirements

- 2+ years of experience in repairing, servicing, diagnostics and troubleshooting all types of equipment is a plus
- Proficient knowledge of mechanical, electrical and hydraulic systems used in diagnostics and repairs of agricultural tractors, light construction equipment, commercial turf equipment and other related equipment to our industry and customer base
- High School Diploma or G.E.D.
- Technical or trade school training with certifications of accomplishments is a plus
- Possess an appropriate tool set for light duty equipment
- Welding and fabrication are a plus
- Must be able to pass a physical to meet our safety standards, a pre-employment drug screening, and a criminal background check
- Valid driver's license is required, does not have to be CDL
- Available to work Monday - Friday from 7:30 am - 4:30 pm

## Benefits

- Competitive Wages in accordance to the Association of Equipment Distributors Guidelines
- Sign-On Bonus for Experienced Mechanics
